PROFESSIONAL PROFILE

Game Quality Analyst with 2+ years of experience across 5 shipped and in-development game titles. Specialized in functional testing, regression, smoke testing and Agile/Scrum QA workflows. Experienced in defect lifecycle management, mobile testing with BrowserStack, test plan execution and cross-functional QA coordination. Strong background as a Point of Contact between QA and development teams, improving communication and release efficiency, and keep developing myself for an automation future.

WORK EXPERIENCE

Quality Control Analyst Neko Games

- Oct 2025 – Present
- Led mobile testing across 50+ BrowserStack device configurations covering Android, iOS, iPads, Windows Phone and tablets in every build.
 - Executed smoke tests and regression cycles on 20+ builds to validate gameplay and escalating critical gameplay and UI defects prior to each milestone.
 - Managed 150+ test cases and suites in Qase and TestRail, maintaining full traceability from test plan creation to execution.
 - Tracked and followed up on 80+ reported bugs in Jira, coordinating directly with devs to verify fixes and reduce defect escape rate each sprint.
 - Conducted regression and checklist reviews in a Scrum cadence, participating in sprint planning and retrospective sessions.

Quality Control Analyst — Rebel Engine Released Title

- Jul 2024 – Nov 2025 Freelance / project-based engagement
- Participated in the full QA cycle from early alpha to public release, executing smoke and regression test cycles across 15+ builds.
- Reported 40+ bugs with detailed reproduction steps, severity classification, and expected vs. actual results.
- Prioritized issues by gameplay impact, contributing to a defect backlog that guided the final two sprints before launch.

Point of Contact — Dreamcore Released Title

- Dec 2024 – Jan 2026 - Freelance / project-based engagement
- Served as POC between QA and development team, centralizing defect escalation and reducing back-and-forth communication by ~40% during final sprint phases.
 - Coordinated test plan execution and regression across 10+ builds, ensuring all critical bugs were resolved before release milestone.
 - Managed issue prioritization using the defect lifecycle framework, classifying bugs by severity and tracking resolution SLAs through Taiga.

Point of Contact — Don't Kill Rumble Planned Release 2026

- Jan 2025 – Jul 2025 Freelance / project-based engagement
- Acted as QA-to-dev POC during pre-production, managing defect communication flow and ensuring issues were escalated and tracked efficiently.
 - Executed regression, smoke testing, and checklist review cycles across multiple builds in an Agile environment.
 - Reported and documented 30+ bugs with detailed reproduction steps, severity classification, and expected vs. actual results.

Quality Control Analyst — Soul Quest Released Title

- Jan 2026 – May 2026 Freelance / project-based engagement
- Conducted thorough bug hunting and reported 40+ issues with detailed reproduction steps and severity classification.
 - Reviewed and executed test plans, validating game functionalities and core gameplay across multiple builds.
 - Evaluated edge cases, assessed behavior against design specifications, and contributed to final quality sign-off.

PREVIOUS EXPERIENCE

Shift Leader — Chicks Gold, Inc.

- Mar 2020 – Mar 2023
- Led a team of 15 people achieving top performance metrics on consecutive occasions.
 - Designed and implemented a customized training structure later adopted company-wide.
 - Managed English and Spanish communication with management and clients.
