PROFESSIONAL PROFILE

QA Analyst with 2+ years of experience across 5 shipped and in-development game titles. Covers functional testing, regression, smoke, and mobile testing across 50+ BrowserStack configurations. Experienced acting as QA-to-dev Point of Contact, coordinating defect escalation and tracking resolution SLAs. Currently expanding into automation with Python, Selenium, and GitHub Actions CI/CD.

WORK EXPERIENCE

Quality Control Analyst **Neko Games**

Oct 2025 – Present · Full-time · Remote

- Led mobile testing across 50+ BrowserStack configurations (Android, iOS, iPads, Windows Phone) in every build.
- Managed 150+ test cases in Qase and TestRail, maintaining full traceability from test plan to execution.
- Tracked 80+ bugs in Jira, coordinating with devs to verify fixes and reduce defect escape rate each sprint.
- Executed regression cycles in Scrum cadence, participating in sprint planning and retrospectives.

Quality Control Analyst **Rebel Engine** — Released Title

Jul 2024 – Nov 2025 · Freelance

- Full QA cycle from early alpha to public release across 15+ builds. Reported 40+ bugs with severity classification.
- Prioritized issues by gameplay impact, guiding the defect backlog through final two sprints before launch.

Point of Contact **Dreamcore** — Released Title

Dec 2024 – Jan 2026 · Freelance

- Served as QA-to-dev POC, reducing back-and-forth communication by ~40% during final sprint phases.
- Coordinated test plan execution across 10+ builds; all critical bugs resolved before release milestone.

Point of Contact **Don't Kill Rumble** — Planned 2026

Jan 2025 – Jul 2025 · Freelance

- QA-to-dev POC in pre-production. Executed regression and smoke testing across multiple builds in Agile.
- Documented 30+ bugs with full reproduction steps, severity, and expected vs. actual results.

Quality Control Analyst **Soul Quest** — Released Title

Jan 2026 – May 2026 · Freelance

- Bug hunting and test plan execution across multiple builds. Reported 40+ issues with severity classification.
- Evaluated edge cases against design specs and contributed to final quality sign-off.

PROJECTS

AI Bug Report Studio [ia-bug-report-studio-final.vercel.app](#)

Personal project — designed, built, and deployed independently

AI-assisted QA tool that generates Bug Reports, Test Scenarios, Test Cases, and Story Reviews using the QA chain a Senior QA Lead would use. Includes per-user isolation, rate limiting, and bilingual UI (EN/ES).

Stack: Next.js · Gemini AI · Supabase · Vercel · TypeScript

QA Automation Framework [github.com/Ryojix3/proyecto-final-automation-testing-jesus-capdevielle](#)

Talent Tech / Buenos Aires Aprende · 2026

End-to-end UI and API automation framework with POM architecture, HTML reports, screenshot capture on failure, and GitHub Actions CI pipeline.

Stack: Python · Selenium WebDriver · pytest · Page Object Model · GitHub Actions · CI/CD
